

Summary

Senior Computer Science major. Experience in web development and data analysis, with a growing interest in cloud data pipelines and analytics systems. Passionate about building reliable data flows and scalable cloud storage solutions. Driven to continuously expand technical expertise and tackle complex challenges across modern data workflows.

Education

Appalachian State University , Boone, North Carolina Bachelors of Science in Computer Science Certificate in Data Science	August 2025 - Expected, May 2027
Ocean County College , Toms River, New Jersey Associate of Science in Computer Science	September 2019 - May 2021

Technical Skills

- Python
 - SQL
 - Java
 - Linux
 - TypeScript
 - React
- Postman
 - BigQuery
 - Tableau
 - Git
 - Gemini
 - Deepseek

Certifications

Google Data Analytics Professional Certification , Coursera	December 2021
--	---------------

Professional Experience

AI Trainer, Handshake Created and tested prompts to assess large language model (LLM) performance in reasoning and user tasks. Evaluated LLM outputs for accuracy and depth across instruction-following, reasoning, and context. Refined AI understanding of human preferences and real-world use cases through expert feedback.	December 2025 - July 2026
Data Analyst, Gembah, Texas Created Tableau dashboards, enabling department managers with quick access to logistics and sales insights. Developed and managed SQL queries in BigQuery to support reporting needs and improve data accessibility. Supported data analysis processes, delivering more accurate insights and contributing to a 10% boost in operational efficiency.	October 2021 - October 2022
QA Tester, Dynasty Sport and Entertainment, Florida Tested system modifications to verify compliance with quality assurance requirements, ensuring successful implementations. Documented steps to reproduce issues, facilitating clear communication, and reducing resolution time by 15%. Identified and escalated potential risks early, helping ensure smoother deployment processes.	October 2018 - March 2019

Technical Projects

Appalhack Website (Appalachian State University Hackathon) Skills: HTML, CSS, JavaScript, GitHub Pages, Webhooks Designed and developed the official website, focusing on a clean, responsive frontend using HTML, CSS, and JavaScript. Replaced a Google Form with a custom-built HTML form, improving user experience and control over data collection. Integrated webhooks to handle form submissions and deployed the site via GitHub Pages for reliable public access.	
---	--

Organizations

Appalhack website Organizer Led design and development of the official website, coordinating with the director to meet team and participant needs. Collaborated with a team of 8, attending progress meetings and helping plan event logistics. Assisted with setup and teardown while actively participating and supporting attendees.	November 2025 - March 2026
Teacher of STEM, Ocean View Academy Assisted students with computer science topics and college-level math, including HTML, CSS, JavaScript, and calculus.	August 2024 - April 2025
