Summary

Junior Computer Science major. Experience in web development and UI design, with growing interest in building responsive, user-centered applications and modern frontend technologies, as well as tools like React and TypeScript. Passionate about creating engaging digital experiences and driven to acquire the skills needed to effectively complete any task.

Education

Appalachian State University, Boone, North Carolina
Bachelors of Science in Computer Science

August 2025 - Expected, May 2027

Ocean County College, Toms River, New Jersey
Associate of Science in Computer Science

September 2019 - May 2021

Technical Skills

- React
- TypeScript
- Python
- SQL
- Java
- Postman
- BigQuery
- Tableau
- Git
- Cloudflare
- ChatGPT
- Deepseek

Certifications

Google Data Analytics Professional Certification, Coursera

Professional Experience

Data Analyst, Gembah, Texas

October 2021 - October 2022

Created Tableau dashboards, enabling department managers with quick access to logistics and sales insights.
Developed and managed SQL queries in BigQuery to support reporting needs and improve data accessibility.
Supported data analysis processes, delivering more accurate insights and contributing to a 10% boost in operational efficiency.

QA Tester, Dynasty Sport and Entertainment, Florida

October 2018 - April 2019

Tested system modifications to verify compliance with quality assurance requirements, ensuring successful implementations.
Documented steps to reproduce issues, facilitating clear communication, and reducing resolution time by 15%.
Identified and escalated potential risks early, helping ensure smoother deployment processes.

Technical Projects

Social Media Communications Platform

Skills: React, Typescript, HTML, CSS, JSON-Server, Tanstack Query, Tanstack Router, Axios

Designed and developed a video-sharing platform with social features such as group creation, commenting, and liking.
Implemented a simulated backend with JSON-Server, handling API requests through Axios and TanStack Query.
Built the frontend in React with state management and context providers, based on initial Figma designs.

Appalhack Website (Appalachian State University Hackathon)

Skills: HTML, CSS, JavaScript, GitHub Pages, Webhooks

Designed and developed the official website, focusing on a clean, responsive frontend using HTML, CSS, and JavaScript.
Replaced a Google Form with a custom-built HTML form, improving user experience and control over data collection.
Integrated webhooks to handle form submissions and deployed the site via GitHub Pages for reliable public access.

Organizations

Appalhack website Organizer

Led design and development of the official website, coordinating with the director to meet team and participant needs.
Collaborated with a team of 8, attending progress meetings and helping plan event logistics.
Assisted with setup and teardown while actively participating and supporting attendees.

Teacher of STEM, Ocean View Academy

August 2024 - April 2025

Assisted students with computer science topics and college-level math, including HTML, CSS, JavaScript, and calculus.
